Die Betriebszeitenerweiterung wird durchgeführt.
Der zuständige Betriebsleiter wurde informiert von am

Grund zur Verrechnung der Servicegebühr liegt vor:

Anmeldung wurde storniert am, Datum von

Information on the extension of operations at Wiener Neustadt OST Airport (LOAN)

1. General Information:

The airfield Wiener Neustadt Ost offers the possibility for take-offs or landings outside the normal operating hours. (Subject to charges according to valid price list) These extensions are limited to the following local times.

In the morning from 07:00 to 09:00 am (no air traffic control flights)

and in the evening from the end of Operations until 10 pm at the latest.

Settlement always after closing time to requested local time!

Take-offs and landings after 10 pm local time are not permitted and may have to be transferred to other airfields/airports.

Aeroclub flights outside the operating hours are only possible Mon - Fri (except public holidays).

The following applies to all extensions of operating times: The airfield must be ready for operation.

The airport operations manager or deputy on duty shall determine this without obligation on the day of flight.

The aerodrome operator shall not be liable for any unacceptable operational readiness, for whatever reason. There is no general entitlement to an extension of operating hours. We reserve the right to exclude individual aircraft/pilots from N-VFR operations in the event of incorrectly flown traffic patterns or repeated other infringements.

2. Registration:

For an extension of operations we need the completed form: "Application for extended Operations".

ATTENTION: A sent application alone is NO WARRANTY for an extension of operating hours.

It is necessary to obtain confirmation from the plant management. (Please call 02622-26700 1357 for further information). Important:

For flights to countries for which a customs and/or passport control is required, a period of 30 minutes before take-off must also be taken into account when extending operating hours, which is required for the clarification or organisation of a customs and/or passport control.

(e.g. planned take-off time 08:00 am local time requires extension of operations from 07:30 am local time).

Applications for extension of operating time can be rejected without giving reasons.

3. Registration Period:

Requests for an operating time extension must be received by us not later than 02 pm local time on the day before the planned flight.

For all requests received after this deadline, the service fee (see 5.) will be charged in addition to the usual fees.

4. Cancellation:

For operating time extensions that are not canceled in time, the following costs will be charged.

Early departure:

Cancellation up to 30 minutes before ECET the day before is possible free of charge.

After this time, 100% of the requested extension of operating hours will be charged.

The full amount will be charged after the end of operating hours or in the event of non-utilization.

Late arrival/late departure:

Cancellation up to 14:00 local time on the same day of the flight is free of charge.

Up to 30 minutes before ECET, 50% of the requested operating time extension will be charged.

Thereafter 100% of the operating time extension will be charged even if not used.

Charges will be made as registered.

TIP: Clarify in time whether the weather conditions (snow, ice, fog etc.) allow your planned flight, in order to avoid unnecessary costs.

5. Service Fee:

All extensions to operating times which have been requested from us by telephone or in writing outside the specified periods or non-registered take-offs and landings outside operating times (delays) will be charged in addition to the service fee, irrespective of the usual fees. The service fee will be charged per started hour from the End of Operations or for early starts before operations.

The service fee will also be charged for flights that exceed the registered time of the operating hours extension. In this case, the last time indicated on the registration form will be used as the billing basis. Please note that the service fee is always charged per aircraft. A division to several aircraft is also excluded if these are operated by an owner, flying club or association or a company.

Additional information: Please note that as an airport operator, we are obliged to report to the authorities any take-offs and landings that are performed without the presence of an operations manager.
